This group has the very serious job of determining the future path of the Cody Elk Herd. Tough decisions must be made, those decisions may not be popular with any, or all, of the interested factions, BUT, they must have the best interest of the Elk Herd, BY UNIT, as their foundation. This is the base principal of conservation, a view towards sustainability of our wildlife in perpetuity so that all generations to follow will be handed down the same gift we have been given. Anything less than this is a band-aid fix with no foresight into the future. Just as we cannot sacrifice one herd for the selfish interests of the general public, so we also cannot allow overpopulation on private grounds that diminishes private property rights. Meaningful remedies must be reached, please make the most of the opportunity before you. Thank You all for your sacrifice of time and energy in the interest of our Cody Elk Herd.
